PROFESSIONAL SUMMARY

Computer Science Engineering (AI & ML) undergraduate with strong proficiency in Python and experience in developing AI-powered and full-stack applications. Skilled in Generative AI, LLMs, RAG pipelines, LangChain, vector databases, and REST API development. Experienced with FastAPI, Flask, React.js, and PostgreSQL for building scalable solutions. Familiar with Agentic AI concepts, semantic search, cloud platforms, and microservices architecture. Strong foundation in Data Structures, Algorithms, OOP, Git, and Agile methodologies, with a passion for building innovative AI-driven systems.

TECHNICAL SKILLS

Programming:	Python, Java, C, JavaScript
Web:	HTML, CSS, React.js, Bootstrap
Frameworks:	Node.js, Express.js, FastAPI, Django, Flask
AI & ML:	NumPy, Pandas, Matplotlib, TensorFlow, Scikit-learn, LLMs, RAG, NLP, LangChain, Embedding Models
Databases:	MySQL, MongoDB, Vector Databases (Basic)
Tools:	Git, GitHub, VS Code, Jupyter Notebook, N8N, Airtable
Core Concepts:	Data Structures & Algorithms, OOP, DBMS, Computer Networks, SDLC, REST APIs, Problem Solving, Debugging & Testing

PROJECTS

Policy Conflict Verification Intelligence Platform - GitHub	<i>Python, FastAPI, React, NLP</i>
- Developed a Python-based policy verification platform using FastAPI and NLP techniques, reducing manual policy review efforts through automated conflict detection and semantic similarity analysis. - Implemented OCR pipelines, clause extraction, and semantic similarity analysis for automated verification. - Designed a scalable microservices architecture integrating frontend, backend, and AI modules.	
CivicLens – Smart Civic Issue Reporting Platform - GitHub	<i>React, Node.js, Google Maps API</i>
- Created a civic issue reporting system with location-based complaint tracking using Google Maps. - Integrated image-to-description generation to automate issue reporting and improve user experience. - Implemented offline synchronization and real-time complaint status updates.	
Healix – AI Mental Wellness Platform - Live Demo	<i>Python, TensorFlow, React</i>
- Built a mental wellness platform focused on user well-being and emotional analysis. - Implemented sentiment analysis and stress detection models for behavioral insights. - Designed an interactive dashboard to visualize wellness metrics and recommendations.	
NVIDIA Stock Prediction Dashboard - GitHub	<i>FastAPI, React, Scikit-learn, WebSockets</i>
- Designed and developed a full-stack stock prediction application using FastAPI, React, and Scikit-learn, enabling real-time data streaming and automated model retraining. - Trained a Random Forest model to forecast next-day stock closing prices using technical indicators. - Implemented live data streaming, prediction tracking, and automated model retraining workflows.	

ACHIEVEMENTS

- Solved 240+ LeetCode Problems:** Strengthened proficiency in Data Structures, Algorithms, and analytical problem-solving.
- NCC C Certificate (2023–2026):** Demonstrated leadership, discipline, teamwork, and organizational skills through National Cadet Corps training.

CERTIFICATIONS

AI/ML Sprint – byteXL	2025
Developed components for Healix, applying responsible AI principles.	
AI Bootcamp – C-DAC Pune (FutureSkills PRIME)	
Completed AI training covering ML, DL, NLP, and AI Ethics (A+ Grade).	

EDUCATION

B.Tech in Computer Science Engineering (AI & ML)	2023 – 2027
Parul University - CGPA: 8.22	
Intermediate (12th Grade)	2023
Viswa Jyothi Junior College - 82.9%
