PROFESSIONAL SUMMARY

Motivated 3rd-year B.Tech student (CSE - AI & ML) with strong foundations in Data Structures, Algorithms, and full-stack development. Experienced in building AI-driven and scalable web applications using Python, JavaScript, and modern frameworks. Passionate about solving real-world problems and developing efficient systems.

TECHNICAL SKILLS

- **Programming:** Python, Java, C, JavaScript
- **Web:** HTML, CSS, React.js, Bootstrap
- **Frameworks:** Django, Flask, Node.js, Express.js
- **AI & Data:** NumPy, Pandas, Matplotlib, TensorFlow
- **Database:** MySQL, MongoDB
- **Tools:** Git, GitHub, VS Code, Jupyter Notebook
- **Core:** Data Structures, Algorithms, DBMS, OOP

PROJECTS

Policy Conflict Verification & Policy Intelligence Platform (Final Year Project)

- Developing an AI-powered platform to detect conflicts, duplicates, and modifications in policy documents
- Implemented OCR, NLP-based clause segmentation, and similarity detection
- Built scalable architecture using React, Node.js, and AI microservices
- Designed RBAC system, benchmarking engine, and automated summary generation

CivicLens – Smart Civic Issue Reporting Platform (Hackathon Project)

- Built a platform for citizens to report public issues like potholes, street lights, and road damage
- Integrated Google Maps for location tracking and navigation
- Implemented AI feature to generate issue descriptions from images with GPS
- Added offline support with auto-sync when internet is available

Business Management System (MEAN Stack)

- Developing application for small and medium scale businesses
- Manages inventory, product details, and damaged product alerts
- Helps businesses improve efficiency and scale operations

Car Showroom Management System (MEAN Stack)

- Developed full-stack application to manage car inventory and showroom operations
- Implemented features for tracking car details, availability, and pricing
- Built responsive UI and REST APIs for efficient data handling

Healix – AI Mental Wellness Platform (AI/ML Sprint)

- Developed during AIML sprint with focus on mental health monitoring
- Implemented sentiment and stress analysis modules using AI

Movie Recommendation System (Machine Learning)

- Built ML-based recommendation engine using user preferences
- Applied data preprocessing and similarity algorithms for recommendations

PROBLEM SOLVING

- Active problem solver on LeetCode
- Strong understanding of arrays, linked lists, recursion, and trees
- Focused on time and space complexity optimization

EDUCATION

B.Tech in Computer Science Engineering (AI & ML)
Parul University (2023 – 2027) | CGPA: 8.23

Intermediate (12th) – Viswa Jyothi Junior College (2022) | 82.9%

ACHIEVEMENTS & ACTIVITIES

- Active NCC Cadet
- Participated in hackathons and team-based development projects
